## **DETAILED ACTION**

### ***Response to Amendment***

Applicant's response of 10/6/09 is acknowledged. The cancellation of claims 11-18 is also acknowledged.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as obvious over Lipman (233).

Lipman discloses a Dice Game.

Regarding claims 1-10, Lipman teaches a first dice with indicia (information) and a second dice with indicia relating to that of the first dice and a method of play therefrom (see abstract and figures). Lipman fails to teach that his indicia relates to consumables or established information. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use any indicia or "established information" desired since it would only depend on the intended use of the assembly and the desired information to be displayed. Further, it has been held that when the claimed printed

Art Unit: 3711

matter is not functionally related to the substrate it will not distinguish the invention from the prior art in terms of patentability. *In re Gulack*, 217 USPQ 401, (CAFC 1983). The fact that the content of the printed matter placed on the substrate may render the device more convenient by providing an individual with a specific type of indicia does not alter the functional relationship. Mere support by the substrate for the printed matter is not the kind of functional relationship necessary for patentability. Thus, there is no novel and unobvious functional relationship between the printed matter and the substrate which is required for patentability.

### ***Response to Arguments***

Applicant's arguments filed 10/6/09 have been fully considered but they are not persuasive. Applicant argues that the printed matter is functionally related to his dice. Examiner maintains that any indicia desired may be utilized, since it would only depend on the intended use of the assembly and the desired information to be displayed.

Applicant further explicitly argues the functional application of the dice in the cited reference of art verses his claimed invention. In response to applicant's argument, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Applicant, claims 1-10, are presented in apparatus format and need to distinguish over structural limitations and not functional limitations or by intended use, such as, “when said first and second dice are simultaneously rolled”

This application is herein made final.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
